

## Core Values

We believe in:

The paramount importance of health and safety.

A never ending quest for creative solutions.

Fostering growth and independence.

The power of Early Intervention to change lives.

Compassion and respect for every person and in everything we do.

## Good to Know

Referrals can come from doctors, parents, day care centers, providers, and the Department of Human Services.

We help people **overcome** obstacles, **develop** skill sets, and **achieve** goals in order to live lives of their own choosing.

## Who We Are

Hi! We're Horizons Early Intervention, a branch of Horizons, and we offer a program for families with a child ages 0-3 expressing delays in learning to crawl, walk, listen, speak, play, feed themselves, or struggling with self-soothing or expressing their feelings. We're here to play, learn and grow together! (for free!)

Want more parenting resources? Check out our Instagram page!

Eligibility for Early Intervention is for infants and toddlers who are showing signs of a delay in:

- cognitive skills
- communication skills
- social/emotional skills
- physical skills
- adaptive skills

Create a **personalized** plan and work with one of our Speech Therapists, Occupational Therapists, or Physical Therapists.

Most children meet milestones and **catch up before their third birthday!** If a child continues to need support, **we've got your back.** A referral will be made to the school district for preschool services.
